

## Welcome Anthony Brookes Surveys Ltd

Anthony Brookes Surveys Ltd was founded in 1995 with the aim of providing Land, Measured Building and Engineering surveys of the highest standard. We believe that the clients needs are paramount and our policy of tailoring each specification to meet these needs has been rewarded with a well-respected reputation throughout the United Kingdom. This belief, coupled with our commitment to excellence, has enabled rapid growth in both our capacity and client base - largely through word of mouth.

We have strict checking procedures for issuing a quality product and are proud to have maintained Quality Assurance standard ISO 9001 since 1997.

Using the latest technology both in the field and office, we are able to provide highly reliable and accurate drawings, in a wide range of formats, all at a most competitive rate.
